

Attention Diabetic Patients:

You Are Scheduled for a CT Exam that Utilizes IV Contrast Media

 (Patient Name)

 (Patient Date of Birth)

Your pre CT lab is scheduled for:

Date: _____ Time: _____ Location: _____

- To avoid any complications associated with diabetes you will need special preparation prior to your CT scan.
- All diabetic patients will need to have a kidney function test done prior to receiving IV contrast. This is due to the increased risk of kidney impairment associated with diabetes.
- Some diabetic medications can pose health risks when used in conjunction with IV contrast media. Please discontinue taking any of the following medications the morning of your CT and for 48 hours following your exam:

▪ Actoplus Met	▪ Diaformin	▪ Glucovance	▪ Metaglip
▪ Avandamet	▪ Dianben	▪ Glumetza	▪ Metformin
▪ Avandryl	▪ Fortamet	▪ Janumet	▪ Obimet
▪ Diabex	▪ Glucophage	▪ Januvamet	
- If you are diabetic and taking one of these medications, you will need to have follow-up labs drawn 48 hours following your CT. You may only resume taking these medications after your lab work has been drawn and you have been contacted by your nurse.

Your post CT lab is scheduled for:

Date: _____ Time: _____ Location: _____

If you have any questions prior to your scan and need to talk to your nurse, please call **(208) 639-4900**. If you need to talk to someone in Radiology, please call **(208) 639-4900**.
