

Dear Patients:

We understand that our country is now facing a pandemic of coronavirus and knowing there is a lot of anxiety and fear with how to stay well. Our team has been working to ensure our facility is clean and sanitized daily, knowing this can be a source of stress for many. We have also started screening 100% of people entering our facility to include patients, family members, staff, and providers. We are watching the public health, CDC, and Idaho Central Health District recommendations and aligning our processes with these daily.

Based on CDC guidelines, we are recommending the following to patients and our teams:

- Please stay at home if you are feeling sick or have an active cough, fever, or other flu like symptoms.
- Please assess your own risk before coming to our facility, especially if you have recently traveled from an infected region, or have been in contact with someone who has a confirmed coronavirus diagnosis
- Practice good hand washing technique
- Avoid handshakes and hugs, instead fist or elbow bumps are the recommended way of greeting

We will continue to provide updates and make adjustments to our processes as we learn more.

Thank you,
